

CAM-BUCKLE TIE DOWN

OPERATING INSTRUCCION

1. *Depress cam-buckle lever and feed webbing through cam-buckle tie down.*
2. *Secure one hook to handle bar and other hook to anchor point on trailer. If cam-buckle tie down is being used for securing cargo, hooks will be attached to proper anchor points and cam-buckle tie down will be routed over the cargo.*
3. *Pull the loose end of webbing until tight.*
4. *NOTE: Hooks, webbing and cam-buckle tie down must be in line with direction of pull for maximum load capacity.*
5. *To release, depress cam-buckle lever and pull webbing outward.*
